

Make the final stroke! No women's slavery in Germany!

For more than ten years now prostitution is just a job like any other in Germany.

The results – dramatic

- Living conditions of women in prostitution – worse than ever.
- The trade in women into forced prostitution – increased dramatically.
- Germany – a center of that trade.

The losers – the women in prostitution

Most of them

- work without a contract, without any kind of safety
- are exploited, work under pressure or compulsion
- drink alcohol or take drugs whilst fulfilling their tasks
- suffer from posttraumatic stress disorders, similar to those of torture victims
- would quit what they do. If they could.

The winners – sex-buyers, panders, brothel-carriers, human traffickers, organized crime.

Prostitution

- supports trafficking in human beings
- is an attack on human rights and woman's dignity
- prevents gender equality
- supports racism, increases poverty
- is a source of violence.

Act now! Vote for a Europe without prostitution!

Sign here for the prohibition of sex-purchase in Germany, against the trade in women as goods and for equality of men and women. Other countries in Europe have already followed that path or do it now: Sweden, Norway, Ireland, France...

The aid and human rights organization SOLWODI helps women and girls who have become victims of human trafficking, forced prostitution or forced marriage and fights politically for the rights of victims of trafficking and women in prostitution.

The signatures collected in the campaign "Make the final stroke!" will be handed over to the German Government by SOLWODI.
